On Friday: 7:30 am to 12:00 pm

How glass containers are generally packed?

- Skrink wrapped on industrial pallets 1200 x 1000 mm
- Pallet weight between 400 kg and 1000 kg per pallet
- Pallet height up to 2350 mm

If pallets have to be double stacked by respecting maximal loading height and weight, load securing is to be carried out by the truck driver.

Which types of truck are acceptable?

- Only closed trucks (Tautliner or boxes) suitable for transporting glass packaging with food grade.
- Minimum loading height 2.40 m
- Box truck always equipped with fork lift. Glass pallets are to be shift by the truck driver.
- Always trucks providing adequate safety appliances according to regulations.
- Always trucks in good technical conditions according to regulations.

In case of collection of full truck loads:

- With tractor unit (26 pallets) or trailer (28/30 pallets) possible
- Number of pallets and loading weight adapted to the total weight acceptable (generally up to 24 tons) to be checked in advance by the carrier.
